

The following alignment is based on these assumptions:

- The KHSAA will continue to use male-only enrollment in their determinations.
- The KHSAA will use the average male enrollment of the two years most recently available prior to their draft alignment. As the draft alignment will be released in early 2015, 2012/13 and 2013/14 are the two years that will be used.
- The KHSAA will maintain usage of six classes. All recent surveys of coaches and school officials have indicated a majority favor this.
- The KHSAA will maintain 32 schools in 6A and 1A. (64/217 schools)
- The KHSAA will equally divide all other classes evenly beginning from the bottom up. (157 schools/4 equals 39.25, meaning 2A has 40 while the other three classes have 39).

This alignment makes no attempt to project the requests of schools to play up or play down, though it does include notes on the requests that were filed prior to the previous alignment.

Classes are separated by color and begin with 6A at the top down to 1A at the bottom.

Schools denoted in ***bold italics*** indicate a movement from their previous class. Their current class is noted in a field to the right of their current two year average.
